

LIQUID FOOT CARE

Product Description

A unique liquid formula that helps provide cattle with protection against digital dermatitis. The special lime formulation remains in long term suspension so that it is always ready for use; its viscosity means that successful application is easily visible; each cow emerges from the footbath effectively wearing protective white socks!

Application

- Protection against digital dermatitis
- Neutralisation of farm effluents
- pH-value adjustment
- Deodorant reagent of organic sludge and waste water

Usage

- Used un-diluted in footbaths for cattle or sheep

CHEMICAL CHARACTERISTICS (using standard operating methods)		
x-ray fluorescence	CaO	72,9 Mass.-%
	MgO	0,6 Mass.-%
LOI		25,3 Mass.-%

PHYSICAL CHARACTERISTICS	
Solid content	approx. 45 Mass.-%
Reactivity (90% conversion)	<5 sec.
pH-value	12,3
Freezing point	-2°C
Density	approx. 1,40 kg/l

Packaging

- IBC

Storage

- Keep away from air
- Avoid contact with aluminium
- Vessels with temporary stirring or pumping

Health and safety

Safety data sheet: Liquid Foot Care
